Business Recommendations

- * Expand Operations in Mexico** Leverage the 25% revenue growth and strong Q2 performance by increasing inventory allocation, dealership support, and localized marketing in the Mexican market.
- * Double Down on BMW Z4 & M4 Promotions** With the BMW Z4 and M4 leading unit sales and contributing significantly to revenue, consider bundling premium services or introducing limited-edition models to maintain momentum and brand desirability.
- * Prioritize Wholesale Channels** The 43% surge in wholesale volume suggests a behavioral shift; expand partnerships and streamline B2B logistics to capitalize on this growth trajectory.
- * Invest in North American Regional Strategy** North America, generating \$96M, consistently outperforms in revenue and growth. Launch targeted dealership expansion and regional promotions to maintain market leadership.
- * Reevaluate Performance in South America and Italy** With South America and Italy showing the lowest revenue, conduct market research to uncover barriers (e.g., pricing, product fit, supply challenges) and restructure efforts accordingly.
- * Data-Driven Inventory Planning** Use country-level and model-level demand insights to optimize stock allocation, reducing underperforming model surplus (e.g., BMW X4) and improving supply for high-demand units.
- * Channel-Specific Marketing Campaigns** With wholesales outperforming other channels by 43%, design channel-specific promotions and loyalty programs tailored to B2B buyers and bulk resellers to maximize momentum.
